ANNUAL SALARY RANGE:
Management Salary Schedule #140 ($93,218.04-$124,917.96/annual)

BACKGROUND: The Associate Vice Chancellor of Information Technology requested the reestablishment of the abolished classification of Director, College Technology Services to provide leadership and direction for information technology activities at an assigned college. The current classification of Technology Support Services Supervisor is responsible for supervising, coordinating, and participating in the analysis, design, programming, installation, and maintenance of college campus technology systems but does not have responsibility for higher-level strategic planning activities. Commission staff recommends the reestablishment of the Director, College Technology Services classification to allow for the appropriate assignment of higher-level responsibilities pertaining to planning and directing information technology activities for an assigned college.

Commission staff also recommends a title change to Director of College Information Technology Services and proposed revisions to the classification specification.

BASES OF RECOMMENDATION: Under the general direction of the Associate Vice Chancellor of Information Technology, an incumbent in the proposed classification will provide leadership, consultation, and strategic direction for information technology activities at a college campus. In addition, the employee will direct, coordinate, and participate in the planning, analysis, design, installation, and maintenance of technology systems, applications, networks, audio-visual technology, and communications systems used at the college. A revised classification specification detailing the approved duties and responsibilities of the reestablished classification is presented for approval in conjunction with this report.

Commission staff recommends that the salary for the classification be allocated to the same salary range in which it was placed at the time it was abolished. Such placement will position the classification at approximately the 67th percentile of the surveyed market. Classifications with similar duties and level of responsibility were found at San Bernardino Community College District (College Director of Technology Services, $80,990-$98,447/annual), Yosemite Community College District (Director of Technology Services, $79,536-$101,136/annual), Kern Community College District (Director, Information Technology, $75,623-$108,019/annual), Los Angeles Community College District (Manager, College Information Systems, $91,144-$112,911/annual), San Diego Community College District (Director of College Technology Services, $96,361-$140,144/annual), and South Orange County Community College District (Director of Technology Services, $116,484-$163,896/annual). Therefore, it is appropriate to allocate the reestablished classification to Management Salary Schedule #140 ($93,218.04-$124,917.96/annual).

Presented to the Personnel Commission on February 19, 2015
VENTURA COUNTY COMMUNITY COLLEGE DISTRICT

CLASS TITLE: DIRECTOR OF COLLEGE INFORMATION TECHNOLOGY SERVICES

BASIC FUNCTION:

Under the direction of an assigned college manager and in coordination with the Associate Vice Chancellor of Information Technology & Telecommunications, manage college information technology department to plan, organize, coordinate and participate in analysis, design, programming, installation and maintenance of college computer equipment, applications, network resources and voice communications systems.

Under the general direction of the Associate Vice Chancellor of Information Technology, provide leadership, consultation, and strategic direction for information technology activities at a college campus, and direct, coordinate, and participate in the planning, analysis, design, installation, and maintenance of technology systems, applications, networks, audio-visual technology, and communications systems used at the college.

REPRESENTATIVES DUTIES:

Plan, organize, and coordinate a wide variety of program development and information technology activities and operations to meet the needs of the at an assigned college and develop goals, objectives, policies, and procedures for the college information technology department.

Consult with college management and the district-level Information Technology Department to identify and prioritize current and future technology needs and solutions; analyze technology needs and provide direction for technology infrastructure acquisitions and upgrades.

Develop, implement, update, and ensure compliance with information technology department program plans and service unit outcomes and prepare related documentation; assess and prioritize campus program review requests in collaboration with technology committees.

Supervise, hire, train, and evaluate technical information technology department staff engaged in designing, implementing, and maintaining complex information technology systems including voice, video, data networks and hardware, applications, web/internet, and network resources and supporting campus technology users in the use of such systems at a college.

Ensure compliance with technology-related accreditation standards and coordinate with campus accreditation coordinators to demonstrate that applicable standards are met.

Coordinate and direct the installation, selection and maintenance of end-user computer hardware, operating systems, and telecommunication equipment, controls and specifications.

Direct the testing, training, and evaluation of computer hardware and software systems, computers, multimedia and audio-visual systems, servers and operating systems, and communications systems network components, switches, wireless access points and other network items for the college.

Reestablished February 2015
Established October 2007
Coordinate and direct the development, implementation, and monitoring of security policies and practices for the college’s networks.  

Provide and review recommendations and suggestions for overall improvement of network systems, and department standards for documentation. 

Assess instructional technology needs and provide input and direction for instructional technology program review plans in collaboration with deans, faculty, and instructional support staff; oversee the implementation and ongoing technical support for classroom technology including computers, peripherals, and audio-visual systems. 

Develop, monitor, and maintain the unit’s designated college information technology budget in collaboration with the Associate Vice Chancellor of Information Technology and the Vice President of Business Services and prepare related reports; budget for ongoing upgrades and support necessary to sustain campus needs and future growth; oversees all related purchasing for the college information technology department. 

Plan, coordinate and organize the operation of the campus-wide help desk services and end user support at the college system used to record and assign service calls; provide direction to information technology staff on prioritizing work requests. 

Develop, implement, and monitor service level agreements. 

Analyze campus technology inventory and provide recommendations for technology refresh purchases. 

Coordinate activities with equipment and repair vendors; assist the purchasing department in securing the best pricing on information systems equipment and services. 

Prepare reports, documentation, and proposals pertaining to technology services; recommend and implement improvements to department documentation processes and standards. 

Perform related other duties as assigned. 

Provide college leadership and consult with administrators, faculty and staff to determine information systems requirements, specifications and priorities. 

Consult with administrators, campus committees, end users and District Office of Information Technology in the development of comprehensive information technology plans for the college. 

Coordinate and participate in training classes and workshops in computer related technical subjects and identifies employee groups to participate in end user training. Evaluate end user training programs to determine their quality and effectiveness. 

Analyze technology support demands, level of work and staff work assignments to determine and recommend appropriate organizational alignment and college information technology department staffing. 

Direct staff in assisting and supporting all campus technology users—hardware, applications, Internet, e-mail and network resources.
DIRECTOR OF COLLEGE INFORMATION TECHNOLOGY SERVICES (continued)

Working with District Office of Information Technology, provide input on technical direction for the information systems networks.

Analyze college-wide technology needs to determine appropriate hardware and software within the current standard offers; recommend technology implementation plans as appropriate.

Direct, evaluate and train technicians and support services staff. Conduct in-service training on computer and network operations.

Ensure consistent use of systems to record and assign service calls.

Work with district Office of Information Technology to ensure implementation and enforcement of district-wide information security standards.

KNOWLEDGE AND ABILITIES:

KNOWLEDGE OF:
State of the art theories, applications, techniques and methods of information technology management as well as educational information technology
Principles and techniques of budgeting, budget reporting and financial management
Principles of employee evaluation, employee relations; concepts of progressive discipline
Principles of staff and end user training including documentation, on-line and classroom instruction
Modern office procedures and equipment
Telecommunications equipment and protocols
Information networking standards and best practices
Information security best practices
Operations, activities, and services of a technology services unit
Modern office procedures and equipment
Communications equipment and protocols
Computer hardware, including desktop, laptop, mobile, servers, storage, and networks
User software applications
Computer operating systems
Audio-visual equipment
Principles of computer systems administration
Pertinent federal, state, and local laws, codes, and regulations
District organization, operations, policies, procedures, and objectives
Principles of budget development and maintenance
Principles and procedures of inventory and records management
Principles of report preparation
English grammar, spelling, and composition
Principles of program planning and program review

ABILITY TO:
Work and manage effectively in a matrix management structure with college and the district Office of Information Technology & Telecommunications
Provide leadership and direction for the information technology services of the college; make decisions and be held accountable for the results
Analyze complex technical, instructional and administrative information to identify relevant concerns and recognize alternatives and to formulate logical and objective conclusions
Develop and recommend modifications to hardware/software, staffing, budget, program dimensions and boundaries
DIRECTOR OF COLLEGE INFORMATION TECHNOLOGY SERVICES (continued)

Prepare concise, understandable technology presentations to college management, faculty and staff as required
Manage a technical staff engaged in implementation and support of complex information technology systems, networks and applications at the college
Write and orally express difficult and complex concepts clearly and concisely
Analyze problems in computer operations and communications techniques
Train, supervise, and evaluate personnel
Maintain current knowledge of technological advances in the field
Plan and organize work
Establish and maintain cooperative and effective working relationships with others

Communicate clearly and concisely, both orally and in writing
Analyze situations accurately and adopt effective courses of action
Select, train, supervise, and evaluate personnel
Maintain current knowledge of technological trends and advances in the field to provide direction for future campus technologies
Analyze fiscal information to develop and maintain budgets
Plan and organize work to meet changing priorities and deadlines
Understand and carry out oral and written directions
Collaborate with others to carry out work
Establish and maintain effective working relationships with those contacted in the course of work
Exercise initiative and independence of judgment and action
Prepare reports by gathering and organizing data from a variety of sources

EDUCATION AND EXPERIENCE:

Any combination equivalent to: Bachelor’s degree in information systems, computer science, management information systems, computer engineering or a closely related field. Four years of recent, full-time experience in systems analysis, information systems design, information systems development, network administration and computer applications training; including two years experience in a management or supervisory capacity. Specific experience with current technology related to instruction is highly desirable.

Any combination equivalent to:

Education: An associate degree with an emphasis in information technology, computer science, or a related field.

Experience: Five years of experience installing and maintaining computers, communication equipment, systems software, and related peripheral equipment, including one year of experience supervising technology support staff. A bachelor’s degree with an emphasis in information technology, computer science, or a related field may substitute for one year of the required non-supervisory experience.

WORKING CONDITIONS:

ENVIRONMENT:
Office/college campus environment
Variable hours, including evenings
PHYSICAL ABILITIES:

Hearing and speaking to exchange information and to provide work direction
Seeing to assure accuracy of work
Dexterity of hands and fingers to operate a computer keyboard
Sitting for extended periods of time
Bending and stooping to repair and install equipment
Lifting heavy computer equipment and supplies

HAZARDS:

Extended viewing of a computer monitor
Extended use of a keyboard and mouse
