

## How to set ABBYY FineReader as your default PDF viewer

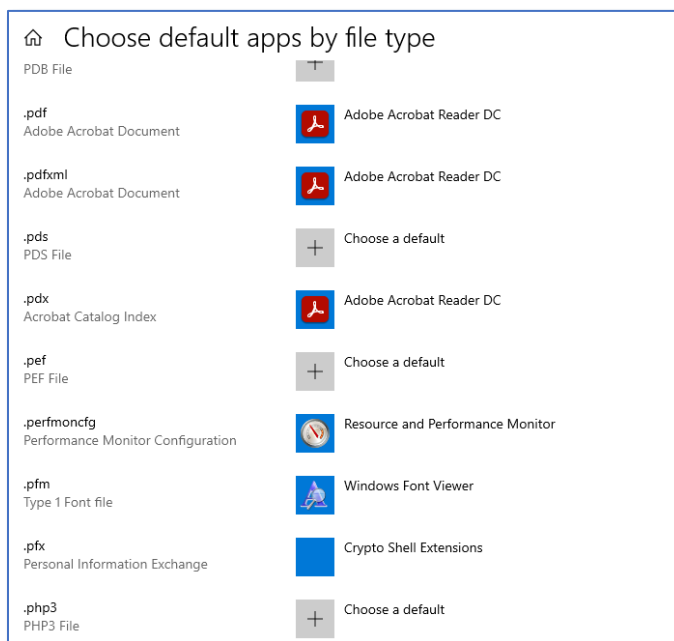

Open the search bar on your Windows start menu and type “Default”. From the resulting search list, click “Choose a default app for each type of file”

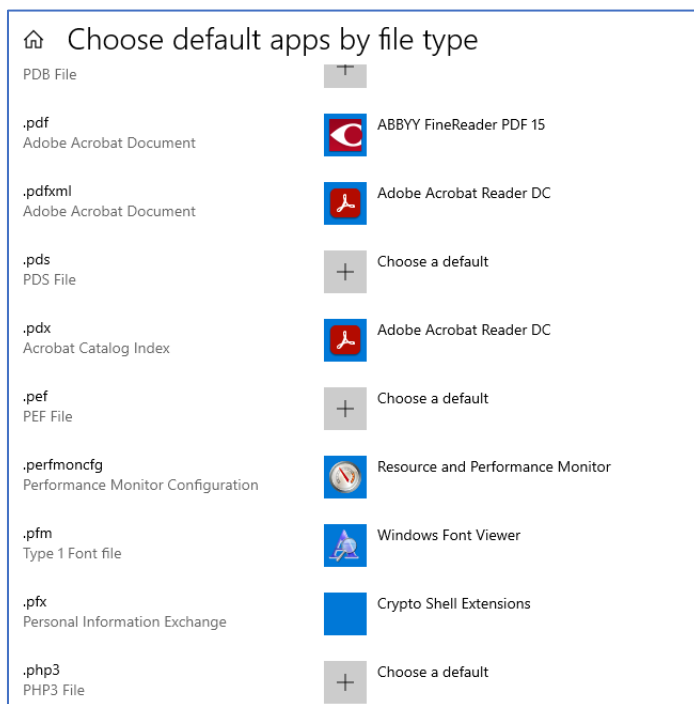

Next, scroll down alphabetically to “.pdf”. Change that file type from “Adobe Acrobat Reader DC” to “ABBYY Fine Reader 15”.

Note: the other two file types are proprietary to Adobe and can't be changed to FineReader

## Before:

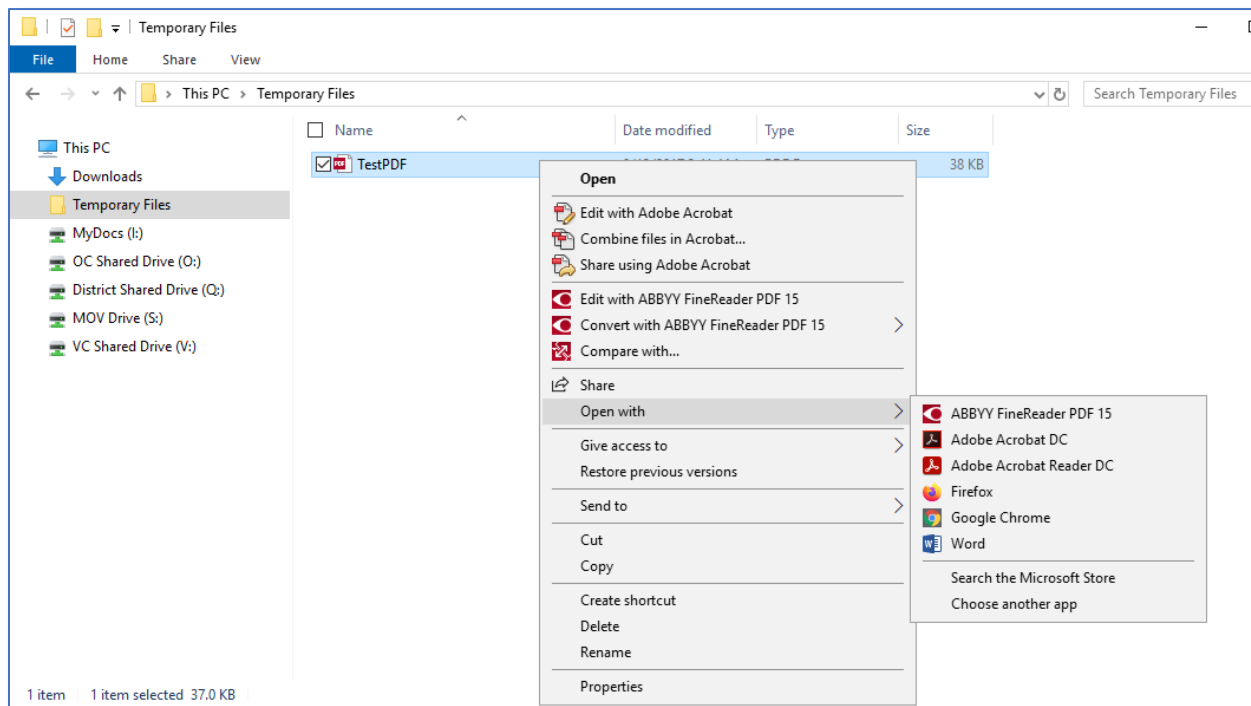

## After:

# ABBYY® FineReader® PDF

Just close the window when you're done. All PDF files should now open in ABBYY FineReader by default.

If you want to open up a specific PDF file in Adobe Acrobat instead, you can always right click on the file, choose "Open With" and select "Adobe Acrobat DC"

All Done!
