At the beginning of the Measure S program, it was necessary to determine how many of the projects included in the Measure S ballot language could feasibly be accomplished. To that end, all projects required some initial preliminary and/or schematic design work and cost estimating in order to develop meaningful project budgets. In April 2005, each campus, in consideration of their respective Educational and Facilities Master Plans, recommended a priority list of projects to the Board for approval. Since that time, bond projects have been added or modified through monthly Board action. Although these particular projects are currently considered suspended, the initial work that was completed is still relevant and available, should these projects be re-activated later through Board action.

At the beginning of the Measure S program, it was necessary to determine how many of the projects included in the Measure S ballot language could feasibly be accomplished. To that end, all projects required some initial preliminary and/or schematic design work and cost estimating in order to develop meaningful project budgets. In April 2005, each campus, in consideration of their respective Educational and Facilities Master Plans, recommended a priority list of projects to the Board for approval. Since that time, bond projects have been added or modified through monthly Board action. Although these particular projects are currently considered suspended, the initial work that was completed is still relevant and available, should these projects be re-activated later through Board action.

At the beginning of the Measure S program, it was necessary to determine how many of the projects included in the Measure S ballot language could feasibly be accomplished. To that end, all projects required some initial preliminary and/or schematic design work and cost estimating in order to develop meaningful project budgets. In April 2005, each campus, in consideration of their respective Educational and Facilities Master Plans, recommended a priority list of projects to the Board for approval. Since that time, bond projects have been added or modified through monthly Board action. Although these particular projects are currently considered suspended, the initial work that was completed is still relevant and available, should these projects be re-activated later through Board action.
