

Mission

The mission of the Blue Envelope Program is to create awareness for law enforcement that any member of our community may have a condition or disability that could impact their behavior or ability to communicate during a traffic stop or any law enforcement contact.

Goals

The goal of the Blue Envelope Program is to improve interactions between law enforcement and our community members by instilling calmness and understanding to those who need it the most.

- We will continually strive to identify organizations within our community with similar goals and objectives and partner with them.
- We will listen and work closely with our community partners.
- We will provide our community with information, materials and resources that facilitate effective communication and help law enforcement quickly identify participants.

COMMUNITY PARTNERS

momentum.
